

SYSTEMS AND METHODS FOR
DURABLE GOODS FUTURES MARKET

Abstract of the Disclosure

Systems and methods for buying and selling durable good futures contracts on a futures market trading interface is provided. The futures market trading interface provides a trader with an ability (i.e., a buyer or a seller) to establish, monitor and control a durable good futures contract. The trading interface may provide options to buy and/or sell a durable good futures contract. In addition, the trading interface may provide options for monitoring relevant futures market information and activity for the durable good futures contract.
